## ORANGE QUEEN

We have been ten years striving for this color—burnt orange—closely resembling that of *Asclepias Tuberosa* (Butterfly Weed). Admired by everyone, and coming at Thanksgiving time its color is in keeping with the season. Habit dwarf, 3 to 3½ feet from June planting, short jointed; dark green foliage, extending up close under the bloom. Loosely incurved form, maturing November 20th from September 10th buds.

\$1.00 ea.; \$8.50 per 10; \$75.00 per 100.
